

TREATMENT OF PRE-ECLAMPSIA (SONUB)

 Basic Emergency Obstetric and Neonatal Care (SONUB) Complete Emergency

 Obstetric and Neonatal Care (SONUC)

WARNING SIGNS :

- Stubborn helmet headaches
- Vision disorders
- Epigastric or right hypochondrium pain
- Convulsive seizure (eclampsia)

* Proteinuria test: use test strips or boil a urine sample in a clean test tube, add a drop 2% acetic acid (vinegar) and see if a persistent precipitate forms, indicating the presence of protein in the sample.
