

Hypoglycemia in children

Treating children avoid hypoglycemia

➤ If the child is able to on:

Ask the mother to breastfeed the child.

➤ If the child is unable to on, but is able swallow:

- Give expressed breast milk or a breast milk substitute.
- If neither is available, sugar water.

Give 30-50 ml of milk or sweetened water (or 10% glu-cosé) before departure.

To sugar water, dissolve 4 level teaspoons of sugar (20 grams) in a cup.

200 ml clean water.

➤ If the child is unable swallow:

Give 50 ml milk or sugar water (or G10%) via nasogastric tube
